

Scaling Outreach Beyond Manual Form Inputs? **Tired of Managing API Keys, Webhooks, and Broken Integrations??**

Manually running this form means managing OpenRouter keys, LLM token limits, CSV downloads, and n8n webhooks. Every time an API changes or a key expires, your workflow breaks.

Pertui AI replaces the entire manual pipeline with an automated engine:

- ⚡ **All-In-One API & Integration Manager:** No need to buy, configure, or manage individual OpenAI, OpenRouter, X, Reddit, or LinkedIn API keys. Pertui AI handles all backend infrastructure out of the box.
- 🤖 **24/7 Autonomous Lead Monitoring:**** Scrapes high-intent buying signals across X, Reddit, and LinkedIn on autopilot—no form filling or manual triggers needed.
- 🎯 **Direct 1-Click Execution Dashboard:** Review AI-drafted DMs, verify lead data, and send messages directly from a clean web UI—zero CSV exporting required.
- 🔌 **Plug-and-Play Project Connectors:** Connect your existing CRM, Notion workspaces, or custom webhooks in 2 clicks with native, zero-code integrations.

 **Lock In Exclusive Early Access**

Stop wasting hours setting up API infrastructure and fighting rate limits.

Quickstart: Setting Up Your Free Automation

Get your automated outreach pipeline
running in under 2 minutes:

Step 1: Set Up Your OpenRouter API Key

1. Click on the OpenRouter Model node at the bottom left.
2. Select or create your OpenRouter credential and paste your API key (sk-or-...).
3. Save the credential.

Step 2: Open and Fill the Form

1. Click on the Prospect Form trigger node (the first node on the left).
2. Copy the Form URL provided in the node settings.
3. Open that URL in any browser tab.
4. Fill in the requested prospect details (e.g., Prospect Name, Post Content / Problem, and Keyword).
5. Click Submit.

Step 3: Download Your AI DMs

1. As soon as you hit submit, the Generate DM node reads the text and drafts a personalized 2-sentence message using OpenRouter.
2. The workflow packs the output into a structured file and redirects you to the Download CSV screen.
3. Click Download to save your Pertui-dm.csv file, open it in Excel/Sheets, and copy your DMs ready to send!
